Next Coalition meeting is **January 28, 2021**

COALITION MEETING REVEALS PROGRESS

Virtual Meeting Held in October

Last month, coalition members and supporters gathered virtually to discuss topics at the forefront of their work. The [meeting presentation](#) can be viewed separately, but here we include topic highlights:

- Adam Crosby, Delaware Greenways' GIS Community Outreach Coordinator, reviewed results from the [Steering Committee's](#) survey, which asked the coalition about program priorities for 2020-2021.
- As part of that survey, it was agreed by members that a need exists for increased trail usage data and trail safety awareness. A group of members volunteered to form a **Trail Usage and Safety Committee for the FTND study area**. The committee will delve deeper into these two topics, to create a path forward.
- FTND Coalition Member, Delaware Greenways announced their [Trail Amenities Matching Grant Program](#). The grant, that will provide added trail amenities (ex. signage, bike racks, benches, fix-it stations) for an existing trail, is open for FTND Coalition [members and supporters](#) to apply, through January 31, 2021. Grant awards will be distributed prior to March 15, 2021.
- The latest developments on four of the [priority trail projects](#) in the study area; **Commons Blvd, Newport River, Brandywine Heritage Trails and the Governor**

- **Member and Supporter Updates:** Newark Bike Project, REACH Riverside, East Coast Greenway Alliance, Millcreek Neighbors for Safer Pathways, the City of Wilmington, Bike Delaware and the National Washington-Rochambeau Revolutionary Route Association Inc. (W3R), each gave updates on their own community efforts.
